Safety Knife Deveze

Show online

Safety Knife to cut electric cables lenghtwise and cardboard tubes up to 50 mm diameter.

The Safety Knife Deveze is specially developed for the industry of electrics, packing and cardbords. The Knife has an 90 degree cutting guide to cut the edges of boxes and small-diametric cylindrical tubes. This enables to cut cardboard tubes up to 50 mm diameter and electric cables lenghtwise.

DEVEZE

BROCHURE CHARTON and DEVEZE (PDF)

The spring-loaded blade retracts automatically when the handle is released.

3 depths of cutting, 3 blades options to tailor to the cutting need. Handle can be locked in the closed position to prevent injures. Easy to use, light and can be used with both the right and left hand.

Can be combined with a Yoyo to keep it always handy. Made in France.

Article No	00208
