

Lockable cardholder REKO, horizontal

Lockable cardholder for high demands and security

Näytä verkossa

RFID cards tend to contain ever more information and have multiple functions. This means that the risk related to losing the card have become higher and a companys security can be in hazard if the card falls into wrong hands. With the increasing use of RFID cards we at ILLBY PLAST have seen a high demand for secure prison/lockable cardholders.

Benefits of a lockable cardholder:

- the card is protected against wear'n tear and dust.
- the print is protected from abrasions and daily wear'n tear.
- card owner know exactly where the card is
