The Slice ceramic safety blade Utility Knives allows the user to choose from three different options.

**Utility Knife Manual 10550** with one of five blade positions, customizing the blade length for each job.

**Utility Knife Auto-Retract 10554** gives you a long blade to cut through thick materials--including triple-walled cardboard, then pulls back to keep you safe when you're done.

**The Slice Smart-Retract Utility Knife 10558** combines our patented ceramic blade with the next advance in safety features: smart-retract technology. Smart-retract ensures that the blade retracts as soon as it loses contact with your cutting material, even if you forget to release the blade slider. This protects against slipping accidents because the blade is exposed only when it's doing its job.

Designed for cutting a variety of materials from clamshell packaging to triple-walled cardboard, the Utility Knives combines strength with superior safety features. It comes with a rounded tip ceramic safety blade that lasts up to 10x longer than steel and is safer to handle. The ambidextrous glass-filled-nylon handle outlasts typical plastic handles for a durable and versatile safety tool that cuts your material cleanly and effortlessly.

- easy no-tool blade change
- safer than metal blades
- durable glass-filled nylon (GFN) handle
- ambidextrous use
- lanyard hole for easy transport
- blade is chemically inert, never rusts
- non-conductive, non-magnetic blades
- 24-millimeter blade cuts triple-walled cardboard
- incl. 1 rounded-tip blade 10526
