

Safety Cutter, two fingers

To safely cut cross-ties and envelopes, various membranes, films and paper

ILLBY PLAST
plast - muovi - plastics

Safety Cutter for two fingers. Dimensionst: 94x30x6mm. Material: Reinforced nylon.

The cutter quickly and easily cut cross-ties and envelopes. The cutter is also very handy in cutting various membranes, films and paper.

[Brochure SAFETY CUTTERS \(PDF\)](#)

In case of an accident a safety cutter would be smart to keep close to the seat belt, since in an emergency a jammed seat belt can be disconnected with the safety cutter. That is why the fire and rescue services call it the safety cutter.

As environment issues are important to us, recycled plastic pellets is used in the manufacturing process of the cutter. The blade is British high quality steel.

The cutter is ideal as business or promotional gift! This cutter can be used right away and because of the small size, you can keep them in your pocket or in the glove compartment of your car! You can also get Your company's logo and contact information conveniently printed on the cutter. Ask for more information!
