

Safety Cutter with logo

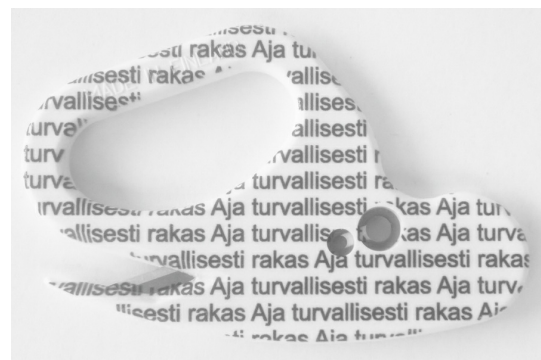

[Show online](#)

NEW! Safety Cutter with a modern logo!

The postage and packaging staff call it a paper cutter. The cardboard and paper industry calls it the cardboard cutter. The plastic film industry names it the foil cutter.

Opening of packaging cartons, bags, cross-ties, various packages and mailings is laborious, time-consuming and expensive over the long run. For this reason many professionals already have implemented the cutter.

The cutter quickly and easily cut cross-ties and envelopes and packages open with ease. The cutter is also very handy in cutting various membranes, films and paperboard. Test it! In case of an accident a safety cutter would be smart to keep close to the seat belt, since in an emergency a jammed seat belt can be disconnected with the safety cutter. That is why the fire and rescue services call it the safety cutter.

As environment issues are important to us, recycled plastic pellets is used in the manufacturing process of the cutter. The blade is British high quality steel.

The cutter is also ideal as business or promotional gift! This cutter can be used right away and because of the small size, you can keep them in your pocket or in the glove compartment of your car! You can also get Your company's logo and contact information conveniently printed on the cutter. Ask for more information!
