SIMPLY HEAVY METAL. WITH TRAPEZOID BLADE.

The SECUNORM MULTISAFE is a real classic that is now available in a brand-new design. It provides excellent durability thanks to its handle made of zinc and its uncomplicated, robust design. With its notable blade extension, you can cut all standard materials. Should you have any particular requirements, you can re-fit the SECUNORM MULTISAFE with one of our many optional blades.

08152

ALL HIGHLIGHTS AT A GLANCE.

ROBUST DESIGN

As you can see and feel, the SECUNORM MULTISAFE is extremely stable. And flexible, since you can use a large number of blade shapes. The product is therefore suitable for many cutting applications.

MADE OF SOLID METAL

The SECUNORM MULTISAFE is a tool that seems to be made of one casting. Zinc die casting, to be precise. For certain industries, e.g. the food industry, the product is also available unpainted.

SLIDE ON TOP

With the right or with the left hand, you ask? Left and right, is the answer! The metal slider is on top of the handle. And can thus be easily used with either thumb.

2-CUTTING EDGE BLADE

Before you have to change the quality blade, you can turn it over once. This doubles the usage time of the blade - and reduces your energy consumption. Because your SECUNORM MULTISAFE will cut again like new.

EYELET FOR FASTENING

Ever since its introduction the SECUNORM MULTISAFE is equipped with an eyelet for tethering your knife to you or a work station.
