

# Safety Knife Secumax Snitty

Show online

A paper and film cutter that guides the cutting material itself?

MAIN GROUP

## A well rounded knife. For paper and film.

A paper and film cutter that guides the cutting material itself? Meet the SECUMAX SNITTY. Its integrated plastic material guide leads thin material in the direction of the blade, smoothing out bumps and preventing jamming. As with the similarly designed SECUMAX COUPPY, the blade lays at a 45° degree angle to the cutting material. An optimal angle for easy cutting.

SECUMAX SNITTY NO. 43037

## All highlights at a glance.

Practical assistant

The SECUMAX SNITTY is small, light and handy. Its round handle sits on a sliding base, which is slanted at the front. This makes access to individual paper and film layers easier.

Changing blades – easy and safe

The blade carrier is integrated into the handle. You just have to pull it out to change the blades – and the old blade is ready to be changed. The rough surface of the blade carrier makes handling easier.

Left and right

The SECUMAX SNITTY fits into every hand. Yours too. The rounded plastic handle does not differentiate between left and right. Try it out and see!

#### 4-cutting edge blade

Your safety knife is fitted with a 0.2 mm thin quality blade. You can turn it and turn it around many times – and thus quadruple your usage time. It's worth it for you.
