

Turvasakset MARTOR SECUMAX 363

Näytä verkossa

Our safety scissors for extra fine and targeted cuts. It is playfully easy to direct, using your thumb and forefinger only.

MAIN GROUP

All highlights at a glance.

Sharp, but not dangerous

Take a good look at the cuts. Noticed anything? None of them have been cut at an angle, as all of the cuts are at right-angles. Therefore you cannot cut yourself, only the large range of potential materials.

Non-rusting stainless steel

You will be able to use your scissors for a very long time as the metal parts are made from non-rusting stainless steel. The handles have been coated in a plastic reinforced with fibreglass. Another guarantee for a long service life.

Comfortable working

"The experts call them "eyes" and these are the small openings in which you insert your fingers to securely hold the scissors. The "soft-grip" on the insides also helps to ensure comfortable and non-slip working."

Short cutting

In brief: this is true precision! This makes the SECUMAX 363 especially suitable for precise, sophisticated cutting. The scissors will not drift away from your line, even when you want to cut in the smallest corners.

Sturdy connection

A matter of course for quality scissors: Both of the cutting edges are held together by a real screw. This ensures sturdy connection and permanent high cutting power.
