Pieni, kevyt, ergonominen ja turvallinen.

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM SMARTCUT guarantees a very high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. The blade can thus withdraw back into the handle immediately after leaving the material being cut.

MARTOR SECUNORM SMARTCUT

All highlights at a glance.

One use, two advantages

The SECUNORM SMARTCUT is a disposable cutter. For you, that means: no risk of injury when changing the blade. The blade will also not get lost in the production process.

Slider on both sides

With the right hand? With the left hand? This question does not arise. Because we have fitted the SECUNORM SMARTCUT with a slider that is accessible from both sides. Choose for yourself!

Light and easy

At only 17 g, the SECUNORM SMARTCUT is a genuine light weight. This also contributes to quick and efficient cutting. Without hands and arms getting tired.

Perfect handling

The product does not only look handy. Its small, rounded handle really does sit comfortably in your hand. And there's much more: So that your thumb doesn't slip, the slider has grooves.

You can't lose it

As compact as the SECUNORM SMARTCUT is - there is an eyelet for tethering the cutter to you or the work station.

Available printing areas

Room for your ideas: The blue marked surface is the area which you can use for your communication (values in mm).
