

Säkerhetskniv SECUBASE 383

Näytä verkossa

Söker du en kniv som skär djupt och tryggt?

ILLBY PLAST
plast - muovi - plastics

Söker du en kniv som skär lätt i tjocka material? Den nya populära säkerhetskniven Secubase 383 har ett skärdjup på över 7 cm. Knivbladet åker automatiskt in då det inte används men kan också låsas i olika skärdjup. Vissa skäruppgifter, så som sågartade, är lättare att utföra om knivbladet kan låsas.

Knivbladet kan lätt bytas ut. Knivbladet är helt dvs. det är inte ett brytblad och då undviker man att knivbladsbitar hamnar i förpackningar, lådor och dylika ställen där de inte får finnas. Kniven fås i olika knivbladslängder och knivbladstyper tex rostfritt stål. Titta närmare i olika alternativ i webbutiken.

How to cut is up to you.

A safety knife that also performs as a cutter? The new SECUBASE 383 can be both. Your cutting tool is equipped with automatic blade retraction to prevent cutting injuries. Some cutting tasks, such as saw cuts, however, are easier with a fixed blade. The blade can therefore be locked in seven different positions to enable efficient working.

All highlights at a glance.

Long blade extension

"Long" is actually an understatement: the blade can extend to a maximum of 7.8 cm. The SECUBASE 383 can then be used for the safe and easy cutting of materials such as 4-ply cardboard boxes, bagged goods, paper rolls, building foam and polystyrene sheets.

Locking and retraction

A choice of seven settings (cutting depths from 7 mm to 73 mm) is available when you want to use your SECUBASE 383 as a cutter. Afterwards, release the lock and the blade will retract as usual.

Ergonomic handle

The SECUBASE 383 has a consistent ergonomic design to protect your hand. The slightly tapered handle is very comfortable to hold. Another ergonomic feature is the slider, which is particularly easy to move because of its built-in ramp.

For right and left hander

The SECUBASE 383 is supplied ready for use by right-handers. Left handers just need to turn the blade by 180° to start cutting. The slider and the lock are operated with the thumb.

Easy blade change

To access the long, flexible blade, use the blue blade change button at the end of the handle. You can now pull out the inner section including the slider. The blade is held in position by two magnets.

Article number	383001
Size	170.5 x 25 x 34 mm
Weight	78,5 g
Material	Glass fibre reinforced plastic
Blade	79
Blade change	Yes
Stainless steel	Yes see webshop
Detectable	No
Color	Blue/black
Food safe	No
Order number	383001.02
Cutting depth	73 mm
Packaging unit	1 in single unit box (10 knives in multipack)
GS-Certificate	MARTOR SECUBASE 383 IGR Certificate 120622 GB
EAN	4002632803277
